Filter Regulator

AW10 to AW60

Filter Regulator with Backflow Mechanism

AW20K to AW60K

JIS Symbol
Filter Regulator

Symbol
Filter Regulator with
Backflow Mechanism

- Integrated filter and regulator units save space and require less piping.
- With the backflow function it incorporates a mechanism to exhaust the air pressure in the outlet side reliably and quickly.

Example)

When the air supply is cut off and releasing the inlet pressure to the atmosphere, the residual pressure release of the outlet side can be ensured for a safety purpose.

How to Order

- Option / Semi-standard: Select one each for a to i.
- Option / Semi-standard symbol: Enter them alphanumerically.

Example) AW30K-03BE-1N

		i	Pressure unit	Nil	Name plate, caution plate for bowl, and pressure gauge in imperial units: MPa				●	●	●	●	●		
				Z ^{Note 11)}	Name plate, caution plate for bowl, and pressure gauge in imperial units (PSI, F)				○ ^{Note 13)}	○ ^{Note 13)}	○ ^{Note 13)}	○ ^{Note 13)}	○ ^{Note 13)}		
				ZA ^{Note 12)}	Digital pressure switch: With unit switching function				—	△ ^{Note 14)}	△ ^{Note 14)}	△ ^{Note 14)}	△ ^{Note 14)}		

Note 1) The AR10 comes with a backflow mechanism as a standard feature. (K is not available.) When using the AW10 type as w/ backflow mechanism, back flow may not occur with the set pressure 0.15 MPa or less.

Note 2) Drain guide is NPT1/8 (applicable to the AW20(K)) and NPT1/4 (applicable to the AW30(K) to AW60(K)). The exhaust port for auto drain comes with ø3/8" One-touch fitting (applicable to the AW30(K) to AW60(K)).

Note 3) Drain guide is G1/8 (applicable to the AW20) and G1/4 (applicable to the AW30(K) to AW60(K)).

Note 4) Option B, G, and H are not assembled and are

supplied loose at the time of shipment.

Note 5) Assembly of a bracket and set nuts (the AW10, AW20(K) to AW40(K))

Including 2 mounting screws for the AW60(K)
Note 6) When choosing with H (panel mount), the installation space for lead wires will not be secured. In this case, select "wiring top entry" for the lead wire entry.

Note 7) The only difference from the standard specifications is the adjusting spring for the regulator. It does not restrict the setting of 0.2MPa or more. When the pressure gauge is attached, a 0.2 MPa pressure gauge will be fitted.

Note 8) Float type auto drain: The combination between C and D is not available.

Note 9) Without a valve function

Note 10) Metal bowl: The combination of 2 and 8 cannot be selected.

Note 11) For thread type: M5 and NPT. This product is for overseas use only according to the new Measurement Law. (The SI unit type is provided for use in Japan.) The digital pressure switch will be equipped with the unit switching function, setting to PSI initially.

Note 12) For options: E1, E2, E3, E4. This product is for overseas use only according to the new Measurement Law. (The SI unit is provided for use in Japan.)

Note 13) ○: For thread type: M5 and NPT only

Note 14) △: Combination available for options: E1, E2, E3, E4.

		N.C.	AD17	AD27	AD37	AD47		

Note 1) Assembly of a bracket and set nuts

Note 2) □ in part numbers for a round pressure gauge indicates a type of connection thread. No indication is necessary for R; however, indicate N for NPT. Please contact SMC regarding the connection thread NPT and pressure gauge supply for PSI unit specifications.

Note 3) Standard pressure gauge

Note 4) Including one O-ring and 2 mounting screws. []: Pressure gauge cover only

Note 5) Lead wire with connector (2 m), adaptor, lock pin, O-ring (1 pc.), mounting screw (2 pcs.) are attached. []: Switch body only. Also, regarding how to order the digital pressure switch, please refer to page 73. A pressure switch adaptor assembly (AW60P-310AS) will be additionally required for the AW60(K) only. Use the attached mounting screw (M3 x 0.5 x 14) for mounting. The mounting screw (M3 x 0.5 x 7) attached to the digital pressure switch assembly will not be required.

Note 6) Assembly of a bracket and 2 mounting screws

Note 7) Please consult with SMC regarding the set nuts for the AW60(K).

Note 8) Minimum operating pressure: N.O. type—0.1 MPa; N.C. type—0.1 MPa (AD27) and 0.15 MPa (AD37/47). Please contact SMC for PSI and F specifications.

Specific Product Precautions

Be sure to read this before handling. Refer to “Precautions for Handling Pneumatic Devices” (M-03-E3A) for Safety Instructions and F.R.L. Unit Precautions.

Selection

Warning

1. Residual pressure disposal (outlet pressure removal) is not possible for the AW20 to AW60 even though the inlet pressure is exhausted. When the residual pressure disposal is performed, use the regulator with backflow mechanism (the AW20K to AW60K).

Maintenance

Warning

1. Replace the element every 2 years or when the pressure drop becomes 0.1 MPa, whichever comes first, to prevent damage to the element.

Mounting and Adjustment

Warning

1. Set the regulator while verifying the displayed values of the inlet and outlet pressure gauges. Turning the regulator knob excessively can cause damage to the internal parts.
2. The pressure gauge included with regulators for 0.02 to 0.2 MPa setting is for up to 0.2 MPa use only (except for the AR10). Exceeding 0.2 MPa of pressure can damage the gauge.
3. Do not use tools on the pressure regulator knob as this may cause damage. It must be operated manually.

Caution

1. Be sure to unlock the knob before adjusting the pressure and lock it after setting the pressure. Failure to follow this procedure can cause damage to the knob and the outlet pressure may fluctuate.
 - Pull the pressure regulator knob to unlock. (You can visually verify this with the “orange mark” that appears in the gap.)
 - Push the pressure regulator knob to lock. When the knob is not easily locked, turn it left and right a little and then push it (when the knob is locked, the “orange mark”, i.e., the gap will disappear).
2. A knob cover is available to prevent careless operation of the knob. Refer to “Features 1” for details.

Note 1) The AW10 is a piston type. Assembly of a piston and a seal (KSY-P-13).

Note 2) Including O-ring. Please contact SMC regarding the bowl assembly supply for PSI and F unit specifications

Note 3) Bowl assembly for the AW30(K) to AW60(K) comes with a bowl guard (steel band material)

Note 4) Check valve assembly is applicable for a filter regulator with backflow mechanism (the AW20K to AW60K only).

Assembly of a check valve cover, check valve body assembly and 2 screws

Filter Regulator *Series AW10 to AW60*

Filter Regulator with Backflow Mechanism *Series AW20K to AW60K*

Working Principle (Filter Regulator with Backflow Mechanism)

AW10

When the inlet pressure is higher than the regulating pressure, the check valve operates as a normal regulator (Figure 1).

When the inlet pressure is shut off and exhausted, any inlet pressure applied to the valve ① will be lost. The force for seating the valve ① is the valve spring force ② only. When the valve ① is opened using the outlet force, the outlet pressure will be exhausted at the inlet side (Figure 2).

When the set pressure is 0.15 MPa or less, valve ① may not open due to the valve spring ② force.

AW20K to AW60K

Figure 1 Normal

Figure 2 Back flow

When the inlet pressure is higher than the regulating pressure, the check valve ② closes and operates as a normal regulator (Figure 1). When the inlet pressure is shut off and released, the check valve ② opens and the pressure in the diaphragm chamber ① is released into the inlet side (Figure 2).

This lowers the pressure in the diaphragm chamber ① and the force generated by the pressure regulator spring ③ lifts the diaphragm Valve ④ opens through the stem, and the outlet pressure is released to the inlet side (Figure 2).

	Z Note 5	Name plate, caution plate for bowl, and pressure gauge in imperial units (PSI, F)	○	○	○	○

- Note 1) Option B, G and H are not assembled and are supplied loose at the time of shipment.
- Note 2) Assembly of a bracket and set nuts (the AW20 to AW40)
Including 2 mounting screws for the AW60
- Note 3) Only metal bowl 2 and 8 are available.
- Note 4) Without a valve function
- Note 5) For thread type: NPT. This product is for overseas use only according to the new Measurement Law. (The SI unit type is provided for use in Japan.)
- Note 6) ○: For thread type: NPT only

Options

Digital Pressure Switch

ISE35—**N**—**25**—**M****L****A**

① ② ③ ④ ⑤

	Symbol	Description
① Lead wire entry	N	Wiring bottom entry
	R	Wiring top entry
② Output	25	NPN output
	65	PNP output
③ Display unit (Note 1)	+	
	Nil (Note 2)	With unit switching function
	M	Fixed SI unit
④ Lead wire	P (Note 2)	Pressure unit: PSI (initial value) with unit display switching function
	+	
⑤ Lead wire entry	Nil	Without lead wire
	L	Lead wire with connector
⑤ Lead wire entry	+	
	A	With accessories (adaptor, O-ring (1 pc.), mounting screw (2 pcs.), lock pin)

Note 1) This product is for overseas use only according to the new Measurement Law.

Note 2) Unit name plate is attached.

Note 3) Instruction manual is attached.

Note 4) When ordering the body only, select the symbol from ① to ⑤ respectively.

Applicable Series

F.R.L. unit	AC20, AC25, AC30, AC40, AC50, AC55, AC60 AC20A, AC30A, AC40A, AC50A, AC60A AC20B, AC25B, AC30B, AC40A, AC50A, AC55B, AC60B AC20C, AC25C, V30C, AC40C AC20D, AC30D, V40D
Regulator	AR20, AR25, AR30, AR40, AR50, AR60
Filter regulator	AW20, AW30, AW40, AW60
Mist separator regulator	AWM20, AWM30, AWM40
Micro mist separator regulator	AWD20, AWD30, AWD40

Digital Pressure Switch Details

Specifications

Rated pressure range	0 to 1 MPa
Set pressure range	-0.1 to 1 MPa
Withstand pressure	1.5 MPa
Set pressure resolution	0.01 MPa
Power supply voltage	12 to 24 VDC, Ripple (p-p) 10% or less (with power supply polarity protection)
Current consumption	55 mA or less (at no load)
Switch output	NPN or PNP open collector 1 output
Max. load current	80 mA
Max. applied voltage	30 V (with NPN output)
Residual voltage	1 V or less (with load current of 80 mA)
Response time	1 s
Anti-chattering function	(Response time selections: 0.25, 0.5, 2, 3)
Short circuit protection	With short circuit protection
Repeatability	1%F.S. or less
Hysteresis	Hyseresis mode Window comparator mode
Display	3-digit, 7-segment indicator, 2-color display (Red/Green) can be interlocked with the switch output.
Display accuracy	2%F.S. 1 digit (at 25°C ±3°C)
Indication light	Illuminates when output is turned ON. (Green)
Environmental resistance	Enclosure
Lead wire with connector	IP40 ø3.4 3-wire 25AWG 2 m

Output

NPN open collector

Max 30 V, 80 mA

Residual output voltage V or less

PNP open collector

Max 30 mA

Residual output voltage V or less

Series AC

Safety Instructions

These safety instructions are intended to prevent a hazardous situation and/or equipment damage. These instructions indicate the level of potential hazard by labels of "**Caution**", "**Warning**" or "**Danger**". To ensure safety, be sure to observe ISO 4414 ^{Note 1)}, JIS B 8370 ^{Note 2)} and other safety practices.

■Explanation of the Labels

Labels	Explanation of the labels
 Danger	In extreme conditions, there is a possible result of serious injury or loss of life.
 Warning	Operator error could result in serious injury or loss of life.
 Caution	Operator error could result in injury ^{Note 3)} or equipment damage. ^{Note 4)}

Note 1) ISO 4414: Pneumatic fluid power – General rules relating to systems

Note 2) JIS B 8370: General Rules for Pneumatic Equipment

Note 3) Injury indicates light wounds, burns and electrical shocks that do not require hospitalization or hospital visits for long-term medical treatment.

Note 4) Equipment damage refers to extensive damage to the equipment and surrounding devices.

■Selection/Handling/Applications

1. The compatibility of the pneumatic equipment is the responsibility of the person who designs the pneumatic system or decides its specifications.

Since the products specified here are used in various operating conditions, their compatibility for the specific pneumatic system must be based on specifications or post analysis and/or tests to meet the specific requirements. The expected performance and safety assurance are the responsibility of the person who has determined the compatibility of the system. This person should continuously review the suitability of all items specified, referring to the latest catalog information with a view to giving due consideration to any possibility of equipment failure when configuring a system.

2. Only trained personnel should operate pneumatic machinery and equipment.

Compressed air can be dangerous if handled incorrectly. Assembly, handling or repair of the systems using pneumatic equipment should be performed by trained and experienced operators. (Understanding JIS B 8370 General Rules for Pneumatic Equipment, and other safety rules are included.)

3. Do not service the machinery/equipment or attempt to remove components until safety is confirmed.

1. Inspection and maintenance of the machinery/equipment should only be performed once measures to prevent falling or runaway of the driven objects have been confirmed.
2. If the equipment must be removed, confirm the safety process as mentioned above. Turn off the supply pressure for the equipment and exhaust all residual compressed air in the system, and release all the energy (liquid pressure, spring, condenser, gravity).
3. Before the machinery/equipment is restarted, take measures to prevent quick extension of a cylinder piston rod, etc.

4. If the equipment will be used in the following conditions or environment, please contact SMC first and be sure to take all necessary safety precautions.

1. Conditions and environments beyond the given specifications, or if product is used outdoors.
2. Installation on equipment in conjunction with atomic energy, railway, air navigation, vehicles, medical equipment, food and beverages, recreation equipment, emergency stop circuits, clutch and brake circuits in press applications, or safety equipment.
3. An application which has the possibility of having negative effects on people, property, requiring special safety analysis.
4. If the products are used in an interlock circuit, prepare a double interlock style circuit with a mechanical protection function for the prevention of a breakdown. And, examine the devices periodically if they function normally or not.

■Exemption from Liability

1. SMC, its officers and employees shall be exempted from liability for any loss or damage arising out of earthquakes or fire, action by a third person, accidents, customer error with or without intention, product misuse, and any other damages caused by abnormal operating conditions.
2. SMC, its officers and employees shall be exempted from liability for any direct or indirect loss or damage, including consequential loss or damage, loss of profits, or loss of chance, claims, demands, proceedings, costs, expenses, awards, judgments and any other liability whatsoever including legal costs and expenses, which may be suffered or incurred, whether in tort (including negligence), contract, breach of statutory duty, equity or otherwise.
3. SMC is exempted from liability for any damages caused by operations not contained in the catalogs and/or instruction manuals, and operations outside of the specification range.
4. SMC is exempted from liability for any loss or damage whatsoever caused by malfunctions of its products when combined with other devices or software.
